

WEEK 5 FINAL PROJECT – GOV/ECON

Welcome to Week 5. We are so impressed with your tenacity to get in and get it done, instead of just throw your hands up and walking away. You hung in there and figured it out! And your reward for all the hard work you completed in the last month, actually the 2019-2020 year, is your **“FINAL” project**. Yes “FINAL” but not like final exam...well technically it can be. However, since you have the most awesome GOVT/ECON teachers in the; city of Tracy, County of San Joaquin, State of California, Country of the World we have developed your FINAL PROJECT for ECON. DRUM ROLL...

Your final Econ assignment/FINAL PROJECT is going to take a lot of critical thinking, reviewing notes, and rehashing lectures to complete.

So, without any further ado...well hold on you DO have a choice between two options. **Option 1** is you can write a letter or **Option 2** is you can record a 3-minute video. No matter what option you choose please include the following:

- 1) The first two minutes of your video is a review of what you learned this year about Government or Economics. You can include the content you learned/remembered, a skill-set you discovered through Govt/Econ class this year. This must be 2 minutes and highlight THIS school year.
- 2) The final minute is a send off for your teacher. A special goodbye since we are not able to see you before summer. Share any moments you specifically remember or particularly enjoyed this year in class. Maybe there was a special moment you needed guidance and wanted to share a personal victory. This is your 60 seconds to do it.

How to turn in: You may submit the work by emailing it directly to your teacher, or by uploading it to youtube and sharing the link. If you write a letter by hand you can drop it off the last drop off date: MAY 15

Extra info: No need to print out ANYTHING. You are turning in either a 3 minute video OR a handwritten letter. PLEASE write neatly!

This concludes our distance learning and your school year. While it is not the way anyone would have wished it to turn out find a silver lining in that cloud. You are safe and alive. You not only survived your senior spring under quarantine you got in and did it. Character is often revealed when no one is watching. Thank you, seniors, for enriching our lives while finishing your high school careers. You are now on to bigger and better things!!
